

you can.

Respond to an overdose.

Take these steps to stop an overdose:

Call 911

Say “someone isn’t breathing or is unresponsive.”

Stay until help arrives, even if they seem better.

Give Narcan®

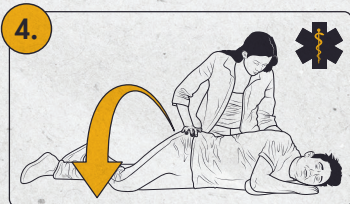

Push pump only after tip is in nose.

If no response in 3 minutes, give another dose.

Give rescue breaths

Make sure mouth is clear. Tilt head back, lift chin, and pinch nose. Give 1 breath every 5 seconds for 3 to 5 minutes and make sure chest rises with each breath.

Stay until help arrives

If breathing well, put on side. If not breathing well, repeat Steps 2 and 3.

Stay until help arrives.

you can. Learn more about Narcan® here.
